

RISK MANAGEMENT PROGRAM

Global Underwriting

International Employee Benefits Solution offered by Allianz.

Centralized underwriting of local employee benefits plans to meet the changing needs of multinational clients and take advantage of global economies of scale.

A risk transfer program to deliver better pricing and product conditions upfront.

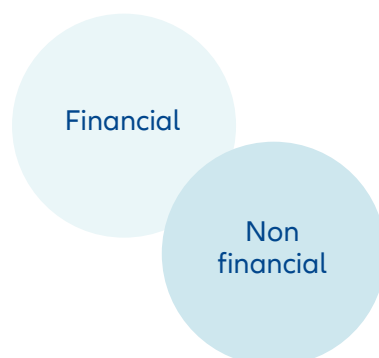

Needs of multinational clients are evolving and driving new global solutions.

Financial requirements

- Economies of scale via global purchasing
- Pricing stability
- Transparent underwriting and pricing
- Analysis on financial performance of employee benefits programs

... and non financial requirements

- Centralized and efficient procurement
- Better use of limited resources
- Data transparency
- Central claim visibility/loss trends
- Reduction in procurement time

Innovative employee benefits solution.

In this risk management program, local pricing is replaced by a global underwriting approach that takes into account overall claims experience, larger insured volumes and a longer term of view of risks than is possible at local level.

This produces lower and more stable prices, better terms and conditions and longer rate guarantees.

It offers

- Central employee benefits steering for underwriting and pricing
- Full risk transfer to the insurer
- Centralized implementation support to ensure smooth local transitions
- Centralized ongoing management support and transparency to optimize governance opportunities
- Escalation option at global level

It covers all protection and medical lines of business

- LIFE
- ACCIDENT
- DISABILITY
- HEALTH
- PENSION (risk elements)
